SUMMARY

Software Engineer with a focus on backend architecture and scalable systems. Experienced in building robust APIs and managing transactional logic for community platforms and service-matching applications. Proven ability to work within founding teams to bridge technical implementation with product growth.

WORK EXPERIENCE

Backend Engineer - Sync360

May 2026 - Present

- Architect and maintain backend APIs powering core platform functionality and business workflows.
- Led the end-to-end integration of Buy-Now-Pay-Later (BNPL) services, designing secure payment flows, handling transactional states, and ensuring reliable payment processing.
- Collaborate with product and engineering teams during standups and technical planning sessions to define requirements, design database schemas, and align on implementation strategies.
- Develop scalable backend services and integrations that support inventory management, order processing, and platform growth.
- Contribute to system architecture discussions, code reviews, and technical decision-making to improve maintainability and performance.

Intern Technologist - Blueapril Technologies

Jan 2026 - April 2026

- Participated in sprint planning, task estimation, and execution activities to ensure timely project delivery.
- Conducted peer code reviews, helping maintain code quality, security standards, and development best practices.
- Developed administrative dashboards and internal tooling to improve operational workflows.
- Collaborated with team members on architectural planning and requirement analysis for a proposed multi-tenant cooperative management platform.
- Worked closely with developers and stakeholders to translate business requirements into actionable technical solutions.

Backend Engineer - Toltimedcare

August 2025 - April 2026

- Managed and enhanced backend infrastructure supporting a healthcare platform, focusing on reliability, scalability, and secure user experiences.
- Maintained and improved backend services critical to the platform's daily operations.
- Designed and implemented RESTful APIs supporting core healthcare workflows and platform functionality.
- Optimized backend processes to improve system stability, response times, and overall platform performance.
- Collaborated with cross-functional teams to support feature delivery and ensure system reliability.

EDUCATION

Bachelor of Science in Software Engineering

Sep 2022 - July 2026

Lead City University, Ibadan

TECHNICAL SKILLS

Backend & Databases: Django REST Framework, FastAPI, NodeJS, PostgreSQL

Cloud & DevOps: REST API Design, Version Control (Git/GitHub), Security & Validation, Performance Tuning, Docker, AWS

Frontend: React.js, Next.js, Tailwind CSS, Responsive UI/UX Development

Languages: English (Proficient)
